

DUETA

DECORATIVE DOWNLIGHT

Choosing your own direction

PHILIPS

D U E T A

Choosing your own direction

> **Enhanced features.** The DUETA family of decorative downlights from Philips Lighting has been extended with the new DUETA 201 which can be adjusted in the ceiling to precisely direct light where it's needed. The DUETA 201 also offers excellent beam qualities due to the use of single ended lamps and a specially designed optic.

> **Consistent styling.** The DUETA 201 is available in white or grey, perfectly complementing the other family members – the DUETA 200 rectangular adjustable downlight and the DUETA 100 round fixed downlight – to provide consistent styling and exceptional flexibility in shop and office lighting.

> **Quick and easy installation and relamping without tools.** Besides the new family addition, the DUETA family also includes enhanced features to make installation even easier. These include redesigned ceiling mounting springs, a restyled rectangular rim on the DUETA 200 and longer cabling between the luminaire and ballast box.

> **Delivered in KIT versions** in attractively designed packaging with everything you need in one box, including pre-mounted lamp.

**Bring a touch of style
to shops and offices.**

By combining style, flexibility
and efficient lighting,
DUETA decorative downlights
are a sensible choice
for shops and offices.

DUETA 201: stylish, compact and versatile

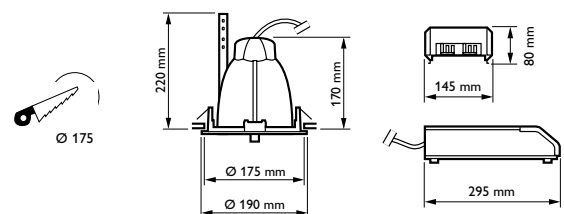

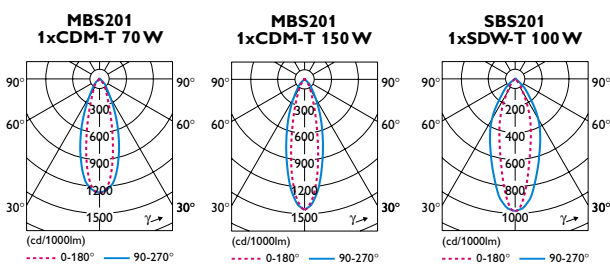

> **Directed light beam.** The new “orientable” DUETA 201 can be adjusted through angles up to 55° to allow accurate directing of light where it’s needed, with a special ‘internal braking system’ assuring smooth, stable adjustment and reliable angle setting. The luminaire also features a single-ended lamp for enhanced beam control.

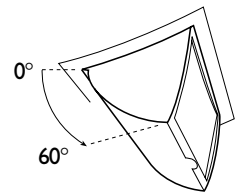

- > **Attractive, compact design** incorporates a range of lamps including CDM-T70W and 150W and SDW-T 100 W (White SON) lamps.
- > **Easy ceiling mounting** is assured by specially-designed retaining springs in a ribbed plastic covering allowing them to be easily gripped and compressed by the fingers for insertion into the ceiling hole.
- > **Separate ballast box** connected to the luminaire can easily be inserted through the ceiling hole when mounting the luminaire.

DUETA 200: functional elegance

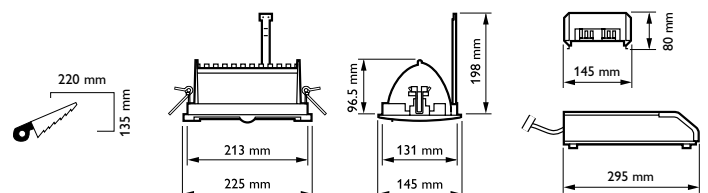

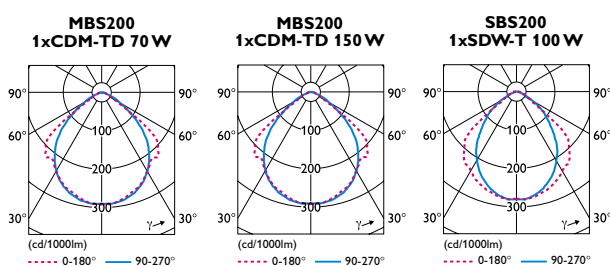

> **Enhanced design for easier installation.** Adjustable through angles up to 60°, the DUETA 200 also features design enhancements including new ceiling mounting springs in a ribbed plastic covering, internal braking system for smooth orientation and reliable angle adjustment and longer cabling connecting to the ballast box.

> **Wider ceiling mounting rim** provides a greater margin for error when cutting rectangular ceiling holes.
