

Mi Smart Scale BMI

Minimalistic low profile design. Accurate data at your reach.

Minimalistic White Exterior | 14.75mm Low Profile Design | Hidden LED Display | 10 Vital Body Statistics

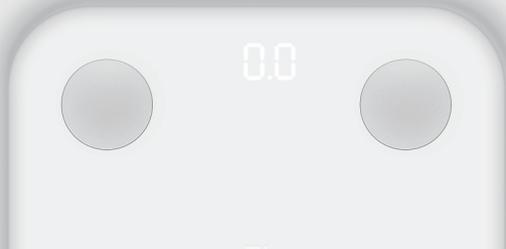

Measurements: Size, Weight, Muscle Mass, Basal Metabolism, bone mass, BMI, Moisture, Visceral Fat Rate, Body Fat Rate, Body Score

-
- Minimalistic Design
 - 10 vital body statistics
 - Low Profile Build
 - Hidden LED display
 - 304L Stainless steel electrodes
 - Supports data storage for 16 people
 - Results automatically uploaded to Mi Fit APP
 - Optional silicone case
-

Mi Smart Scale BMI

Hidden LED Display

In order to achieve a clean minimalistic look, the traditional approach of creating an obvious indent for the display is abandoned but replaced by an ultra transparent ABS plastic that covers the whole scale where the LED is only visible when lit up. The result is a super clean but highly visible readout when weight is detected.

Safety Mechanisms

Safety should always be taken seriously during the design process. Xiaomi Body Metrics Scale is no different. With our prominent metal circular design, we have eliminated all sharp corners on the electrodes which traditionally leaves room for injuries. Similarly, we have incorporated extra large non-slip underside padding to increase stability and confidence when load is being put on the scale.

Stainless Steel Electrodes Ensure Accurate Readouts

Scale uses 304L grade stainless steel. In comparison to traditional bio-coated or aluminium-based electrodes, stainless steel has the advantage of increased accuracy and at the same time reduce the risk of oxidation. Industry standard dictates that direct current should be used but in order to further increase accuracy, Xiaomi Body Metrics Scale departs from the norm to use the more reliable alternating current technology on its electrodes.

Instructions:

- 1) Install batteries (4x AAA)
- 2) Download and install the Xiaomi Sports App
- 3) Follow the onscreen instructions to sync the Xiaomi Body Metrics Scale with your App

NOTE: Bluetooth 4.0 connection , works with terminals running Android 4.4 and iOS 8.0 and above

Specifications:

- 1) Dimensions: 300mm x 300mm x 20mm
- 2) Load Range: 5kg-150kg
- 3) Mass Increments: 50g
- 4) Operating Temperature: 0° C-40° C
