| ated switching capacity according to IEC/EN 60898-1   | I <sub>cn</sub>        | kA | 10   |
| esign verification as per IEC/EN 61439  |                        |    |  |
| echnical data for design verification   |                        |    |  |
| Rated operational current for specified heat dissipation  | I <sub>n</sub>         | A  | 10   |
| Heat dissipation per pole, current-dependent  | 'n<br>P <sub>vid</sub> | w  | 0  |
|   |                        |    |  |
| Equipment heat dissipation, current-dependent   | P <sub>vid</sub>       | W  | 1.5  |
| Static heat dissipation, non-current-dependent  | P <sub>vs</sub>        | W  | 0  |
| Heat dissipation capacity   | P <sub>diss</sub>      | W  | 0  |
| Operating ambient temperature min.  |                        | °C | -25  |
| Operating ambient temperature max.  |                        | °C | 75   |
|   |                        |    | linear, per +1 °C, results in a 0.5% reduction of current carrying capacity    |
| C/EN 61439 design verification  |                        |    |  |
| 10.2 Strength of materials and parts  |                        |    |  |
| 10.2.2 Corrosion resistance   |                        |    | Meets the product standard's requirements.                                     |
| 10.2.3.1 Verification of thermal stability of enclosures  |                        |    | Meets the product standard's requirements.                                     |
| 10.2.3.2 Verification of resistance of insulating materials to normal heat  |                        |    | Meets the product standard's requirements.                                     |
| 10.2.3.3 Verification of resistance of insulating materials to abnormal heat<br>and fire due to internal electric effects |                        |    | Meets the product standard's requirements.                                     |
| 10.2.4 Resistance to ultra-violet (UV) radiation  |                        |    | Meets the product standard's requirements.                                     |
| 10.2.5 Lifting  |                        |    | Does not apply, since the entire switchgear needs to be evaluated.             |
| 10.2.6 Mechanical impact  |                        |    | Does not apply, since the entire switchgear needs to be evaluated.             |
| 10.2.7 Inscriptions   |                        |    | Meets the product standard's requirements.                                     |
| 10.3 Degree of protection of ASSEMBLIES   |                        |    | Does not apply, since the entire switchgear needs to be evaluated.             |
| 10.4 Clearances and creepage distances  |                        |    | Meets the product standard's requirements.                                     |
| 10.5 Protection against electric shock  |                        |    | Does not apply, since the entire switchgear needs to be evaluated.             |
| 10.6 Incorporation of switching devices and components  |                        |    | Does not apply, since the entire switchgear needs to be evaluated.             |
| 10.7 Internal electrical circuits and connections   |                        |    | Is the panel builder's responsibility.   |
| 10.8 Connections for external conductors  |                        |    | Is the panel builder's responsibility.   |
| 10.9 Insulation properties  |                        |    |  |
| 10.9.2 Power-frequency electric strength  |                        |    | Is the panel builder's responsibility.   |
| 10.9.3 Impulse withstand voltage  |                        |    | Is the panel builder's responsibility.   |
| 10.9.4 Testing of enclosures made of insulating material  |                        |    | Is the panel builder's responsibility.   |
| 10.10 Temperature rise  |                        |    | The panel builder is responsible for the temperature rise calculation. Eaton w |

| 10.11 Short-circuit rating          | Is the panel builder's responsibility. The specifications for the switchgear must be observed.           |
|-------------------------------------|--|
| 10.12 Electromagnetic compatibility | Is the panel builder's responsibility. The specifications for the switchgear must be observed.           |
| 10.13 Mechanical function           | The device meets the requirements, provided the information in the instruction leaflet (IL) is observed. |

## **Technical data ETIM 8.0**

Circuit breakers and fuses (EG000020) / Miniature circuit breaker (MCB) (EC000042)

| Electric engineering, automation, process control engineering / Electrical installa<br>(ecl@ss10.0.1-27-14-19-01 [AAB905014]) | tion, device / Mir | niature cir | rcuit breaker system (MCB) / Miniature circuit breaker (MCB) |
