

DOWNLIGHT COVER 60-85 MM, PROTECTIVE FOR HALOGEN AND LED LAMPS

Product description

A specialised downlight cover D60 is intended for creating a safe distance between the insulation layer and the source of light in the wall. Mounted LED and halogen lamps need to get rid of the heat, which is created from the internal side of the wall. If there is an insulation layer implemented, it is necessary to "move it away" from the light source for the purpose of fire safety, as well as for the purposes of extending durability of the light source. Mounting: · Drill the mounting hole with a diameter 60-85 mm. · Insert the downlight cover into the hole and push it using fingers outwards, so that its teeth get into the sides of the hole. · Insert the lighting fixture and embed it traditionally with the use of spring wings between the downlight cover's ribs.

D60

Product specifications

Catalogue number	83300002
Name of item	D60
EAN code	5907813226540
Colours	blue
Unit	pcs
Collective packaging	25
Height	80 mm
Diameter	60-85 mm
Material	polyamide PA 6 / halogen-free / self-extinguishing
Resistance to heat	960 °C
Destiny	A specialised downlight cover made of self-extinguishing halogen-free polyamide, which is safe in the electrotechnical context. This product is intended for creating a safe distance between the insulation layer and the source of light in the wall. Mounted LED and halogen lamps need to get rid of the heat, which is created from the internal side of the wall. If there is an insulation layer implemented, it is necessary to "move it away" from the light source for the purpose of fire safety, as well as for the purposes of extending durability of the light source.
