

Fits any project.

Modular installation system for professional EV charging infrastructure.

Designed to
make your life easier.

Today's installations are still messy, slow and inconsistent.

- Lots of improvisation on the site
- Different chargers – different setups
- Time lost on problem-solving – less profit
- Inconsistent quality & finish

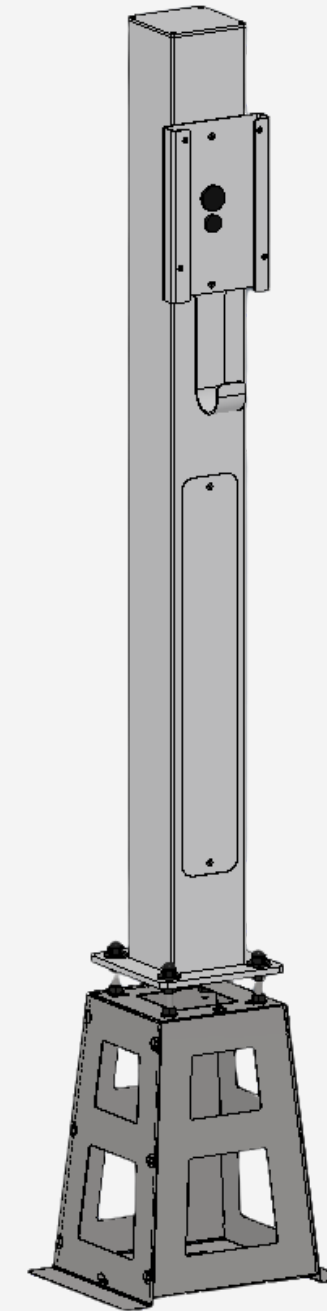

Existing solutions are not built for installers.

- Each charger brand has its own dedicated pedestal
- Little to no flexibility
- Limited accessories or no accessories at all
- Mostly made from heavy steel

..let us help you.

The smarter way to plan, build, and scale charging infrastructure.

We replace improvised, one-off solutions with a clear, repeatable system — from ground to charger — helping you work faster, cleaner, and with confidence.

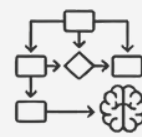

One system. Any charger. Flexible configurations.

ModuREX is built as a complete installation system. Each component is designed to work together, reducing on-site decisions, simplifying logistics, and delivering consistent results across all projects.

Faster installations

Clear system logic

Guaranteed compatibility

Scales with demand

Do it the right way. Earn more. Do less.

ModuREX helps you move beyond one-off installations by bringing structure and consistency into how you deliver projects — making it easier to scale your operations and stay competitive as demand grows.

Increase profit per installation

Standardize your offering across projects

Reduce operational friction

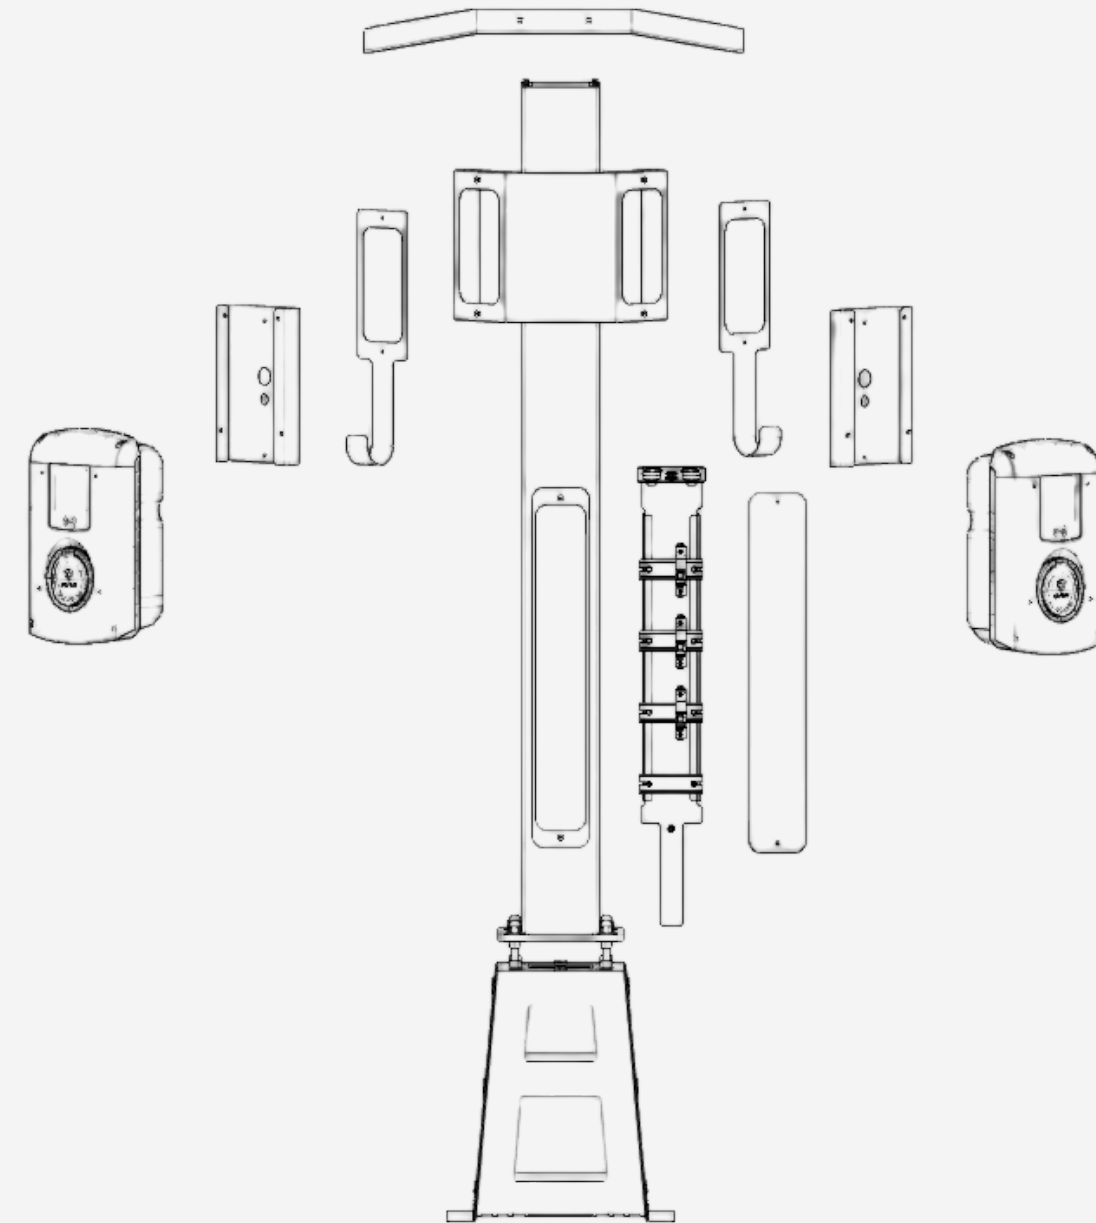

Build a scalable, repeatable installation model

Configure it to your client's needs.

- Adapts to any site requirements
- Works with any charger — no limitations
- Modular components that work seamlessly together
- Add/change components as customer needs evolve
- Clean, professional result every time

Core Basic

- For simple, single household installations
- Fits any charger, up to 1
- IP44 / IK10
- Additional accessories:
Core Fit, Core Hook, Core Roof

Core Pro Rail

- For professional, more complex installations
- Fits any charger, up to 4
- IP44 / IK10
- DIN mount with 4 DIN rails, 6P on each rail + M8 grounding
- Up to 35mm² terminals
- Adapter for mounting onto 60mm pole
- Additional accessories:
Core Fit, Core Expand, Core Hook, Core Roof, Core Schuko, Core CEE16 or CEE32, Core Halo or Beam

Both products have the same dimensions: 135x135x1491mm

Core Fit

- Charger specific design
- Comes with mounting hardware & cable grommets
- Guaranteed fit

Core Hook

- Convenient cable management
- Optional add-on
- Universal

Core Expand

- Side by Side or Angled at 45 degrees
- For 2 charger installation
- Easy cable routings and hidden cables
- Comes with mounting hardware and cable grommets

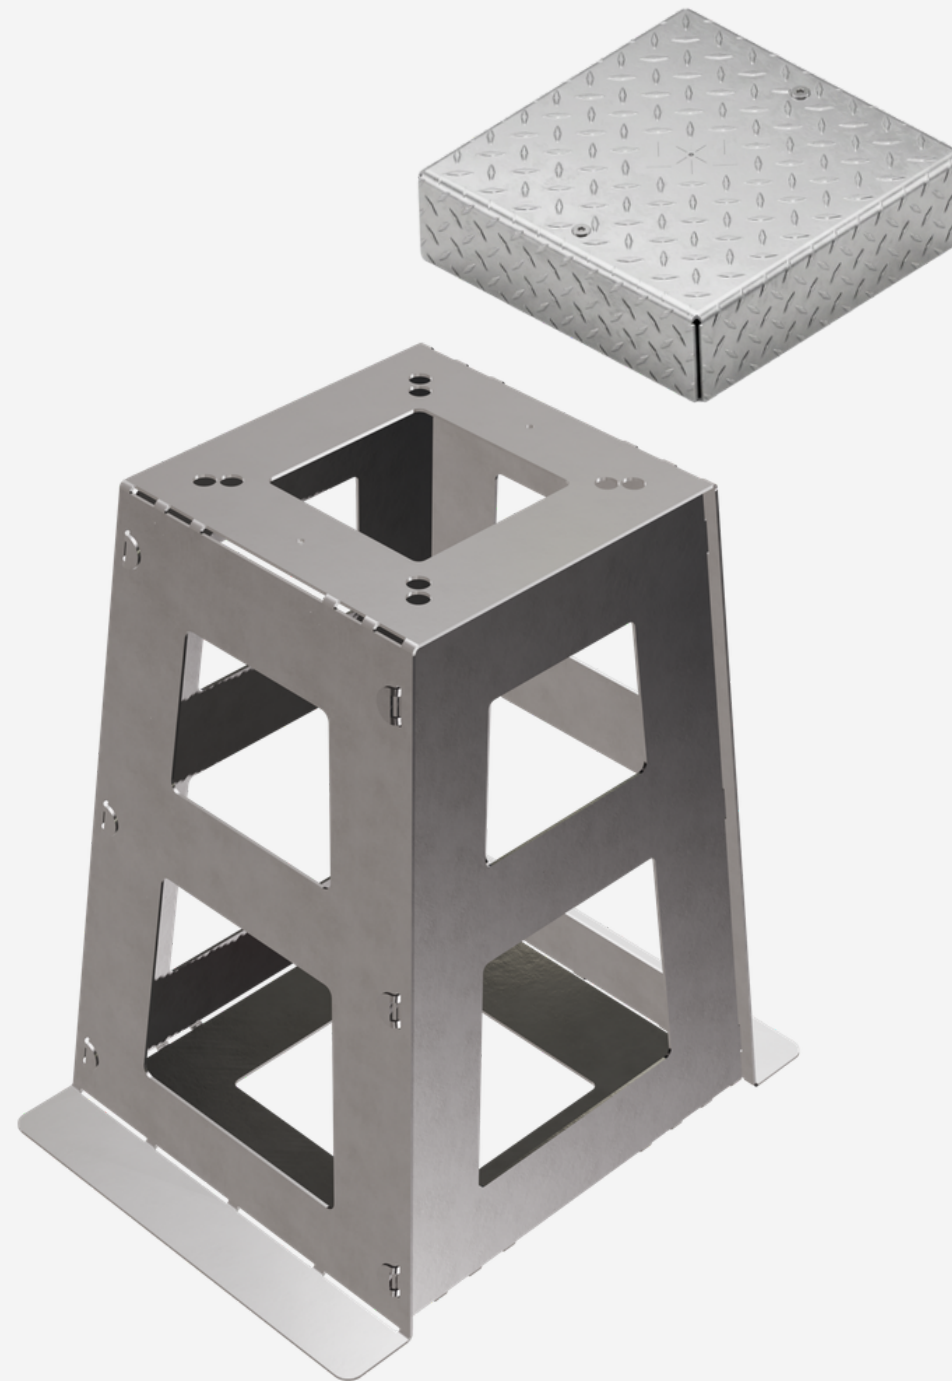

Core Schuko

- 2x Schuko outlets
- IP54
- Comes with mounting hardware

Core Groundbase

- From galvanised steel
- Fits both CC140 and CC160
- Lightweight, only 6.6kg
- Comes with mounting hardware M12
- Delivered as flat-pack
- Easy assembly, takes 1-2 minute

Core Ready

- Future-ready infrastructure
- From high-quality aluminium treaded plate
- Comes with mounting hardware
- Clean, professional finish

Ready to improve the way you install?

ModuREX gives you a smarter, more efficient way to deliver installations — with less hassle, better results, and a system you can rely on as your projects grow.

- Start with a system that works from day one
- Simplify how you plan and execute installations
- Deliver consistent, professional results
- Build a setup that scales with your business
