## **Product fiche**

| Supplier name or trademark                | Duux   |
|-------------------------------------------|--------|
| Model identifier                          | DXMA11 |
| Indoor Model Identifier(s)                | DXMA11 |
| Outdoor Model Identifier                  |        |
| Inside sound power levels (Cooling mode)  | 65 dB  |
| Outside sound power levels (Cooling mode) | - dB   |
| Refrigerant Name                          | R290   |
| Refrigerant GWP                           | 3      |

contribute less to global warming than a refrigerant with higher GWP, if leaked to the atmosphere. This appliance contains a refrigerant fluid with a GWP equal to 3. This means that if 1 kg of this refrigerant fluid would be leaked to the atmosphere, the impact on global warming would be 3 times higher than 1 kg of CO 2, over a period of 100 years. Never try to interfere with the refrigerant circuit yourself or disassemble the product yourself and always ask a professional.

## **Cooling Mode**

| Cooling wode                   |                                                                                                                                                                                     |
|--------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Energy Efficiency Ratio (EER)  | 2,6                                                                                                                                                                                 |
| Energy Efficiency Class        | А                                                                                                                                                                                   |
| Hourly electricity consumption | Energy consumption 1,5 kWh per 60 min-<br>utes, based on standard test results. Actu-<br>al energy consumption will depend on how<br>the appliance is used and where it is located. |
| Cooling capacity               | 3,8 kW                                                                                                                                                                              |
